Why did you choose these words in particular? I'm just curious.

AI Language Chat bot:

Sure! I chose these words because they are commonly used in academic and professional contexts, and they can be helpful for Japanese university students to communicate effectively and confidently in English.

For example, words like "collaborative," "productive," and "efficient" can be useful in group projects or work settings, while words like "curious," "insightful," and "perceptive" can help students develop critical thinking and analytical skills.

Meanwhile, words like "empathetic," "authentic," and "enterprising" can help students develop interpersonal skills and adapt to changing environments.

Overall, my goal was to provide a range of vocabulary that can help students express themselves more precisely and confidently in English, both in and out of the classroom.
